## DETAILED ACTION

### *Current Status*

Claims 1-3 and 5 are pending in the application.

### *Priority*

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims** 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Kerdel et al., {The Role of 1,2-epoxyindene in the Metabolism of Indene in Vivo, Biochemical Society Transactions, 1978, 6 (4), 785-787}.

Kerdel et al. discloses applicants claimed compound (1-hydroxyindan-2-ylmercapturic acid), that is, when X is S, Y is O, R<sub>1</sub>-R<sub>4</sub> are hydrogen, R<sub>5</sub> is CH<sub>2</sub>CH(NHR<sub>7</sub>)-COR<sub>8</sub>, R<sub>7</sub> is C(O)C<sub>1</sub>-alkyl and R<sub>8</sub> is OH. See page 786, scheme 1.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 and 5 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 5, 8-12 and 15-18 of copending Application No. 10/981,045. This is a provisional obviousness-type double patenting rejection.

The presently claimed compound of general formula I, wherein X is S, Y is  $(CH_2)_p$ , p is 0, 2 or 3 and R<sub>1</sub>-R<sub>5</sub> are as defined in claims 1-3 and 5 of the present invention are disclosed in copending Application No. 10/981,045. See claims 1-3, 5, 8-12 and 15-18 of copending Application No. 10/981,045.

formula I

Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the claims overlaps substantially with the scope of claims 1-3, 5, 8-12 and 15-18 in the copending Application No. 10/981,045, and the

genus of the copending Application No. 10/981,045 encompasses the species in presently claimed invention. They differ in that the compound of general formula I of the presently claimed invention is a subgenus of the compound of general formula I in the copending Application No. 10/981,045. These differences are not a patentable distinction because Application No. 10/981,045 teaches the elements of the claimed invention with sufficient guidance, particularity, and with a reasonable expectation of success, that the invention would be *prima facie* obvious to one of ordinary skill in the art.
